

I would appreciate clarification regarding the development and implementation of the Ethnic Studies Program as it relates to the Jewish Cultural Experience. I have been asked to provide explanation regarding the published accounts that are accused of being bias, misleading, or inaccurate accounts of the historical record of the Jewish experience in the US. My client base is composed of professional, college graduate, and community motivated people. Many with children who will be attending the neighborhood public schools. My client base is most interested in a fair and accurate study of all ethnic groups.

Thank you,  
Leslie Randall
