Subject: Model Curriculum on Ethnic Studies

I understand that you are in the process of developing a model curriculum on ethnic studies, including a that Arab American students study Israel/Palestine issues and the BDS movement. I also understand that thus far you have refrained from including Jewish people and anti-Semitism as well as many other ethnic minorities that make up a substantial portion of California's residents. Including the BDS movement in a high school curriculum on ethnic studies is irresponsible at best. Including that while failing to include anti-Semitism is an affront to the Jewish community. Please remedy this injustice before finalizing the curriculum.

Thank you very much.
