In an article written by Mark Twain entitled "Concerning the Jews" he wrote "In Berlin a few years ago, I read a speech which frankly urged the expulsion of the Jews from Germany; and the agitator's reason was as frank as his proposition. It was this: the fifty-five percent of the successful lawyers of Berlin were Jews, and that about the same percentage of the great and lucrative businesses of all sorts were in the hands of the Jewish race." Please remember that this was many years before the rise to power of the NATIONAL SOCIALISTS who made this envy the basis of their policy. Envy is at the root of the Social Justice movement which brings the Jew hatred of the far left and the far right together. But, sadly, the majority of American Jews refuse to face this fact.
