

Dear Sir or Ma'am,

>

> I strongly oppose the proposed new curriculum teaching that capitalism and the free market is bad or even racist. Don't you realize that there wouldn't be public education without capitalism. I heard that this curriculum also includes anti semitic lessons. If this is true, I encourage you not to move forward with this radical left wing indoctrination of our youth. I will not allow my child to attend any school or class that teaches this social indoctrination. I will move to a private schools so fast it'll make your head spin.

>

> Here's and idea.....How about concentrating on teaching reading , writing, mathematics. And, most importantly, encourage critical thinking. Students should learn how to research and learn all sides of public issues and make educated choices. A government that leads people around by their noses wrong. Just ask the citizens of Hong Kong and Venezuela.
