Subject: [EXTERNAL] Anti semitism

Recently it was reported California is pushing some kind of ethnic education policies. This should be your policy: discrimination against any ethnic person will not be tolerated. Anti Italian, anti French, anti Irish, anti Muslim, anti German, anti black - none of this is acceptable. Likewise there should be no anti Catholic, anti evangelical Protestants, anti Sikh, anti Buddhist, anti Islam, and anti Jewish. Educate your children by having social skills classes on how to be kind and how to embrace each other's differences.

It appears your ethnic studies is the beginning of an effort to demonize Israel and Jews. It also appears to be supported by activists who are pro BDS and anti Israel. From reports, the push to highlight and promote pro Palestinian propagandists like Linda Sarsour And pro Palestinian agendas like BDS is frankly despicable and shameful. Please educate yourselves in where the money to push this ethnic Education is coming from. If you are planning to educate American children about the Middle East, you may want to start with 50 Muslim countries, that all expelled Jews in the past 100 years, And 1 little tiny country that is blamed for everything that is wrong with the world Except allowing Jews to come to their country.

Let's educate our children in how our government works and it's true history including the slave trade, the heinous treatment of blacks and native Americans, and it's amalgam of cultures we should all embrace. The United States needs to unify, not divide. Educate where people came from and value our heritages. Do not include propaganda that is pro Palestinian and anti Israel. Question why people want to push that agenda. Why is it always little tiny Israel that is constantly harassed? Why is it always the Jews who are bad? This is what extremists do- put false info into school books As facts. Follow the money behind this change in curriculum. You will not find any Jewish organizations supporting it
