Subject: ethnic studies model curriculum
general comment

My Name, David Patterson

My Comment: I am amazed to find while reading this document how really unhappy and perhaps massively confused the people who created it seem to appear. My heart goes out to them regarding the conditions they seem to be suffering from. I have never seen such "Claptrap" and Hogwash presented by a government agency. Any parent who discovered that his children were being subjected to this material would only have one choice, which would be to take his children out of the school as soon as possible. This is a pitiful display of incompetence.
