

To whom it may concern,

I'm a parent of two school aged students in the state of California. I saw on the news last night that the state is trying to pass a class called Ethnic Studies and will soon be a requirement to graduate. If this class passes I will immediately seek legal action against the state!! This is so outrageous and you have no right to impose this type of learning on my children. I pay several thousands in taxes!

I would like a response back immediately!
