I am deeply offended at the continued refusal to treat antisemitism with equal emphasis and importance in the proposed curriculum. There is absolutely no reason for this. For example, Jews are the only group in California's proposed curriculum for whom the term "privilege" is used. The unequal treatment of Jews in the proposed curriculum is nothing short of blatant discrimination and hatred.

Today, I read the following article. If you needed any proof that antisemitism is alive and well right here in our back yard, here it is (and there are many many more who feel this way. You could see by reading their blogs and Facebook groups.)

After these posts were exposed – including by a former classmate of his who had no idea he was like this – the California bar investigated him and unbelievably found no actionable conduct.

Iran should do the world a favor and wipe terrorist zionist state of Israel off the map to solve the world's Jewish problem once and for all. Had the US not sacrificed himself for the Jews in world war 2 and Hitler would have won, we would have never had any of the wars and terrors we see in the world and middle east today and the world would have been in peace. We need a new Hitler to rise!
