

Dear Sirs,

Sometimes the best intentions go astray. That's what's happened here with the ESMC. However well purposed this needs revised so as to inoffensive to all member of this a very diverse community. Obviously you people fell, likely unknowingly, into some serious traps. Please listen to the criticism of the members of the Jewish community and revise this.

Let me add parenthetically, a sizeable number, but still pretty small minority of Jews agree in some measure with the BSD movement's purpose, if not it's implementation or the nefarious aims of some its supporters toward Israel. This too needs to be revised to explain in some cases it's being used to try to destroy Israel as a country.

It all needs rethought and revised. Good will on everyone's part will make this a better, fairer, document for all our children to learn from.

Howard Perer M.D.
