To whom it may concern:

I am an immigrant from Poland whose fathers family were all killed during WWII, he was the sole survivor.

The curriculum on ethnic studies must be reviewed and changed to rid it of any Jewish bias. It is unfair and dangerous to not only Jewish students but also to others who are not aware of the terrible history of Anti-semitism. To associate the word privilege with only one group-the Jewish people, is morally and historically wrong! Please contact me if you need further information as to how this could impact people and would have a negative ripple effect.

Thank you for your consideration of this important matter.

Sincerely,

Roma Adelman Hoffman
