That indoctrination of students by teachers and professors occurs on a daily basis, and the idea that it can be prevented by the "guardrails" that the ethnic studies curriculum committee has put in place is absurd. If you google the American Association of University Professors (AAUP) Statement of Professional Ethics you will learn that professors are expected to "avoid any exploitation, harassment or discriminatory treatment of students. Clearly Dr. Abdulhadi violates this code in every lecture. Also, "When they speak or act as private persons, they avoid creating the impression that they are speaking or acting for their college or university." When President Lew Wong tried to distance the SFSU from Dr. Abdulhadi's repeated statements that Zionists are not welcome on this campus she responded by saying that he had "declared war on Arab students." In her support of BDS she creates the impression that her views do represent the university. Her violations of the professional code of ethics are abundant and the university and the CSU are responsible for allowing her to continue unabated in fostering the reputation of SFSU as the most antisemitic university in the US.
