

Dear Kenneth McDonald and the Curriculum advisory committee ,

I am a community member deeply concerned about the California Department of Education's proposed Ethnic Studies Curriculum. This curriculum endorses prejudice against Jewish, Israeli-American, and Zionist students, and delegitimizes their heritage and identity. I ask that you respectfully consider removing the currently proposed curriculum from the California Department of Education website. Every day that the file is available, it does damage to the educational environment. As it has already been announced that the curriculum will change, the unacceptable material should no longer be available to the public.

Thank you

Erline Rabin
