Subject: Comments for new studies curriculum

Hello,

I want to view the course outline and content for the new ethnic studies program. I have not heard good things about it and want to take a look at it myself so I can make a well informed comment.

I need Microsoft Office to open it? Are you kidding? How many average people have Microsoft Office?

To me this seems to be a way of limiting viewing to the general public and seems like a very sneaky move by the Dept of Education.

Sincerely,

Patrick Kennedy
