Golden State History
Curriculum Task Force att: Tony Thurman

Do you recognize the statewide disaster:
Millions of teens are at risk to ignorance
of our landscape and people.

The HSS framework for 8th grade is confusing failure!

We must add basic knowledge to 7-8th grades to
guarantee basic knowledge of our natural
and human systems. We now are trying
to have political goals become the
scientific facts.

Failed leadership is shown by those who make the cheap shots
of racism and bias "white, black" and "left" or
rightwing. Ethnic studies serves to document the
North American perspective and US history
of our ancestors.

You will be conditioned as we grow this
purpose:
to fix the disaster, boost the USA PROUD LEARNING
call-to-action, and fix the problem to improve teaching
our history.

Riccardo Gaudino, Education Director
Golden State History
