In Holder v Humanitarian Law Project the US Supreme Court upheld the conviction of the promoters of a "Teaching Peace" curriculum finding that it provided "material support" for a terrorist group on the US State Department list of designated terrorist organizations which is a crime under the Patriot Act. It is for this reason that Zoom withdrew their platform from Leila Khaled. She is an active leader of the PFLP which is also on this list. Zoom did not want to risk being similarly convicted of providing material support for a designated terrorist organization. When Dr. Abdulhadi teaches that Leila Khaled is to be revered she is providing material support to the PFLP and teaching students that terrorism is not only justifiable but to be emulated and engaged in. And when Lynn Mahoney and the CSU uphold her right to do this criminal teaching they become accessories to her crime. I hope I have made it clear that this is not political influence. It is respecting the law of the land as written by the US Congress and upheld by the Supreme Court.
