Subject: [EXTERNAL] Arab Studies

The attempt to end the Arab Studies program in the Ethnic Studies Model Curriculum is being driven by anti-Semites, the Zionists, because any reasonable coverage of Araby must include Palestine, the heart of Araby. The Palestinians are important for the world as a whole, because it was with them that Judaism developed, and so Christianity: they were the first majority-Jewish nation and one of the earliest majority-Christian nations. Some people do not want this widely known. Please do not give in to these concealers of history.
