Subject: [EXTERNAL] Comment about ESMC Third Field Review

Hello, I am writing to say that I hope this curriculum is not adopted for the children of California.

It is wrong to identify human beings solely, or even significantly, only in terms of whatever sub-groups to which they belong. (as in 'intersectionality') It is poisonous, and has been demonstrably poisonous, by these past tumultuous years since its increasing prominence in American society.

Please do NOT adopt this toxic, anti-human curriculum.
