Subject: [EXTERNAL] South Korea Peninsula historical country in the world and still divided South and North in the world.

South Korea,
peninsula little country has been having so many histories from around countries as China, Japan, Russia. Each country invaded Korea's histories. However, Koreans overcame difficulty, attacked from offended, discriminated, lost their spirits, but created and built today's lives.
It should be an educational source in public education. It is a reflection to learn in interethnic relations of the best resources.

Sincerely
