Bailey Spears	Phoenix, AZ	2020-08-11	"As a member of the Pacific diaspora in the mainland US, I deeply resonate with a feeling of disconnect and misunderstanding of my ancestors. Everything I've learned about my culture was passed down through my family. I never once had the opportunity to learn about my people in a classroom setting throughout my 12 years of school between kindergarten and high school. The only explanation I can assume as to why this is the case is that the public school system in the US does not want to acknowledge the death and destruction that occurred in the Pacific Islands because of colonialism. This act of hiding the truth from any students but particularly Pacific Island students is unjust. We deserve the right to learn about our history in school along with everyone else. Beyond that, we deserve to know the accurate history of colonization that reveals its negative effects, not just a history that celebrates the white men who "discovered" and "progressed" the island nations. It wasn't until I was at an insti"

The Pacific is a huge place, full of vibrant beautiful cultures, and it deserves just as much attention as any other part of the world."
Tupouleota Tongilava	Bay Area, CA	2020-08-12	"PI and Arab studies should absolutely be a part of the curriculum. These ethnic communities are prevalent in the Bay Area.
