

Dear Department of Education-Tony Thurmond,

I was appalled when I heard of this total one-sided/hate inducing 300 pages of the Ethics Study Model. How could a 15 person committee create such a model and claim it benefited our youth.

Where was the truth. All I saw was an attempt to indoctrinate our youth with hate and distrust and that poem about the police was just a way to feed propaganda to our youth.

It is disheartening that the curriculum made it through the DOE it appears without a concern. It was only after the public became aware of its extreme bias did the Department admit it was majorly flawed.

I will be following closely and would hope for the sake of our state that the DOE better serves our children.

Note, I have been a member of the public school community in California since 1998.

Barbara Vais
