

Public Comment on Ethnic Studies Curriculum

<p>Gail Reisman, PhD Sorel Reisman, PhD</p>	<p>As much as we support the concept of ethnic studies, we are very upset at the insensitivity and disregard in this curriculum regarding the presence of a Jewish minority (only 2% of the population) in America...its contributions as well as its history of persecution and its current vulnerability both nationally and internationally.</p> <p>We also question the focus on Israel and are suspicious about the source of the material presented.</p>
