

To the California State Board of Education, State Superintendent of Public Instruction Tony Thurmond,

The proposed California ethnic studies curriculum is sick and twisted. It has nothing to help our children become aware of there culture. I do not wish to have this course offered, used as a graduation requirement or used in the future as a guide to be used across the nation.

This is not what we send our kids to school to learn. It does not promote learning because it is anti-Semitic, is anti-capitalism and Anti-American. It promotes Cop killers who have fled to Cuba, PLO members, Black Panther members. It does not prepare our children to become critical thinkers and contributors to the great nation that we have the privilege to live in.

I certainly hope that our governor who signed to the law to create this curriculum, Tony Thurmond and Katie Porter are taking action to protect the future of our Great State of California, the United States of America and most importantly, our children.

Thank you,

Celeste Bingman
