Subject: ethnic studies curriculum

The State of California is currently reviewing a model Ethnic Studies curriculum, which openly promotes hateful boycotts against Israel and omits antisemitism as a form of bigotry. Disturbingly, this agenda was inserted into an educational effort meant to teach students about marginalized communities. Moreover, despite its stated purpose, the proposed curriculum includes no lessons about Jews as a sizeable ethnic minority and frequent target of racism.

Please reconsider. there is enough hatred and racism in this world and this new curriculum model will only further it. Thank you ,
